

MOVEABLE PROTECTIVE MANAGEMENT (MPM) BOOTH

(Made by: Akkaraipattu Base Hospital)

This moveable protective management (MPM) booth provide a barrier between the healthcare workers administering the management and the patient.

They offer significant protection for the staff, while reducing the need to change masks and other personal protection equipment (PPE) between tests.

After studying booth that had been used in several hospitals around the world, Akkaraipattu Base Hospital designed their innovative moveable protective management (MPM) booth to be more modular, easy to use and economical. They established this moveable protective management (MPM) booth by use of high quality materials.

The rubber fabric full sleeve arm part was designed to fit perfectly with latex gloves. It is providing the

higher protection to the healthcare workers' hands and allows the perfect fine movement of fingers.

The rubber boots fitted with lower part of the moveable protective management (MPM) booth allow the healthcare worker to walk around and the four wheeler protective management (MPM) booth will move along with healthcare worker as well.

Features:

1. Opacity of moveable:-

The healthcare worker can driver the MPM booth in any direction with usual walk.

2. High-quality friction free wheels with manual lock:-

All four wheels can be locked when moveable protective management (MPM) booth wanted to be still.

3. Adequate ventilation with positive air pressure:-

Positive air pressure is maintained by using portable oxygen concentrator (OXYMAT®3). It protects from entry of contaminated are into the moveable protective management (MPM) booth.

4. Adjustable tubes

Lengthy adjustable with sterilization tubes of stethoscope and digital pressure meter can be adjusted in length with sterilization of sprite.

5. Two way audio Communication

Easy two way audio communication system running by the source of electricity in direct current.

6. Clear glass walls

Lower weight washable clear glass walls, it's provide the clear vision in 360 degree and easiness to drive with ordinary walk.

7. Foldable front table:

It's can access the patient maximum closer when it folded down. Also can place the necessary equipment which needed to be used outside of moveable protective management (MPM) booth, on it, when extended up.

We would like to thank our sponsors

1. Lifeline Private Enterprises, Ampara
2. Zam Zam Pharmacy, Akkaraipattu
3. Vimal Tailoring, Akkaraipattu

We would like to give a big salute to our hospital maintenance team who provided marvelous technical support and dedicated service to completion of the moveable protective management (MPM) booth.

The basic idea and designing done by Healthcare Quality & Safety Unit team.

Thank you everyone who worked hardly for this successful effort to establish this moveable protective management (MPM) booth.

Thanking You,
